PROFESSIONAL WORK EXPERIENCE**Cybersecurity Analyst****JPMorganChase - New York, NY****Nov 2024 – Present**

- Supported cyber operations for the firm's acquisition portfolio as part of a first-of-its-kind centralized security team, providing services comparable to an MSSP.
- Triaged detection alerts from CrowdStrike NG-SIEM, Cortex XDR, and heuristic Exabeam detections.
- Incident response for high severity true positives and high-priority items from the firm at-large.
- Vulnerability intelligence and exposure management of vulnerabilities via CrowdStrike EDR and Cortex XDR
- Detection rule development and SIEM log validation for CrowdStrike NG-SIEM.
- Implemented the team's AI development initiatives, including custom AI agents and token optimization techniques for NG-SIEM and LogScale documentation, improving the accuracy and fidelity of AI-generated queries.
- Implemented Bitbucket repository for team's AI coding projects, led with a triage detection assistant and QA review assistant for NG-SIEM detections.
- Cataloged and developed CrowdStrike Real-Time Response (RTR) scripts for the team.

Cloud Administrator**Jan 2024 – November 2024****STARK Carpet - New York, NY**

- Cloud administration of Microsoft's Azure products - Entra ID, InTune, Exchange, Sharepoint, and O365, as well as VMWare ESXi suite/hypervisor configurations.
- Incident response and threat detection via Sentinel One, Huntress, and the Azure cloud suite.
- Network Administration of SonicWall TZ-series configurations and networking, and Datto networking equipment/suite, including Datto RMM, Datto Backup solution, and implementation of Datto switches and WAPs.
- Troubleshoot a wide range of issues, such as Hubspot CRM, IBM AS400/Dancik sales system and print server, point-to-site VPNs, PowerShell scripts to resolve issues, hardware issues, internal tools - inventory management applications, order processing, etc.

Info Security Engineer Lead (GRC)**Jan 2023 – December 2023****Citibank - San Antonio, TX**

- Member of the Multi-Factor Authentication Assessment team within the firm's GRC pillar.
- Reviewed IAM, MFA & SAM standards to prepare the organization for auditors and regulators.
- Reviewed FFIEC compliance across all internal applications, end goal was bolstering the company's security posture by collaborating closely with application owners on MFA requirements.
- Reviewed Citi's external customer password requirements, resulting in the implementation of robust security measures and an enhanced customer experience.
- Queried IBM Cognos via SQL to generate actionable insights from complex data sets, empowering data-driven decision-making for the MFA assessment team.
- Key project: development and deployment of a new internal inventory application that improved efficiency by consolidating key golden sources to improve response times to vulnerability incidents.

Network Administrator**Oct 2020 – January 2023****Pathways Youth & Family Services - San Antonio, TX**

- Notable projects completed: Implementation of content filtering via Cisco Umbrella DNS, network authentication via RADIUS protocol linked with Active Directory, network segmentation through VLANs for on-site guest networks, and site-to-site VPNs with Cisco firewalls in a mesh-grid.
- Installation of IP camera systems and wireless access point solutions in multiple office and homecare facility locations. Regularly replaced and reconfigured drops and patch panels in older offices.
- Hardware Repair of desktop PCs and laptops, administration of firm's email solution Google Workspace and its MDM solution on BYOD devices.
- Supported and maintained 13 office locations and network infrastructure, including Netgear switches, Cisco firewalls, Windows Servers, and Ubiquiti Unifi and Cisco Meraki access points.
- Maintained site backups via Synology NAS, regularly tested MTTR for on-premise and off-premise servers, and maintained the company website's content and DNS records.

Desktop Support Technician

Jul 2018 – Sep 2020

Daemon Systems, LLC - San Antonio, TX

- MSP help desk and on-site technician for both hardware and software issues.
- VPN implementation for Covid WFH workplace changes for multiple network environments.

IT Intern – Desktop Support

Aug 2017 – Dec 2017

SWBC – San Antonio, TX

- End-user MACD/EMAC regarding telephony profiles in PBX and VOIP phone systems and Windows AD profiles.
- Assisted in daily office hardware checks and new office workstation setups.

EDUCATION

- **Bachelor's (BBA) in Management Information Systems** **Texas A&M University-Corpus Christi**
Completed
- **Master's (MS) in Cybersecurity and Information Assurance** **Western Governors University**
